

Syntron® Dental Packers

Years of trouble-free service in the compaction of dental molds.

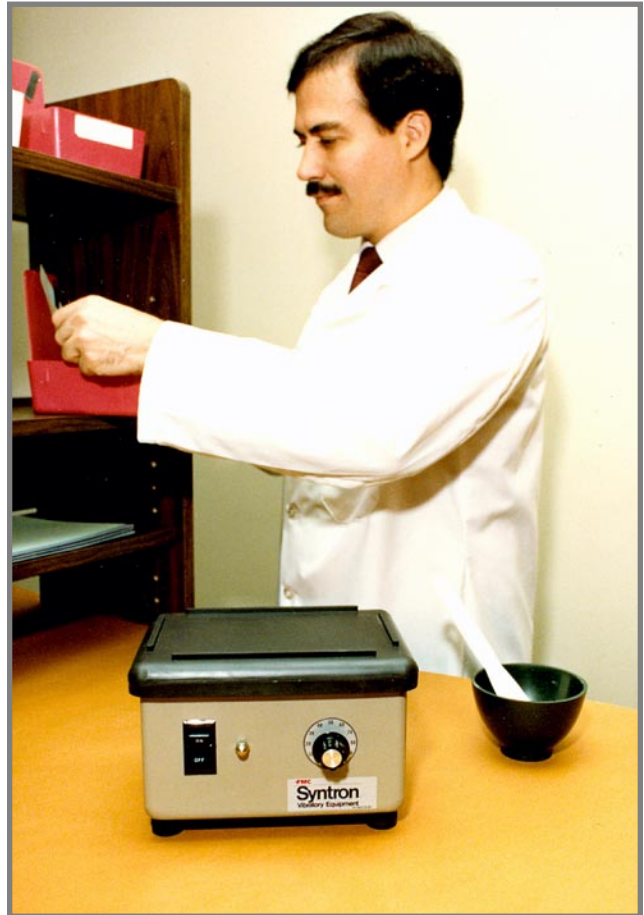

-
- **Durable**
 - **Variable Control**
 - **Easily Cleaned**
-

FMC Syntron® Dental Packers compact investment materials at the turn of a dial. They free trapped air bubbles and provide added density and strength to the dental investment.

Syntron Dental Packers are durable. Their electromagnetic design offers several advantages. They have no moving parts; therefore, they never need to be lubricated and part replacement is minimized. Since they are not motor driven, they can operate continuously without damage from heat build-up. Their high-frequency vibratory action (3600 vibrations per minute) eliminates trapped air bubbles and voids in fresh dental molds, thus assuring solid, dense molds.

Unlike competitive models that provide only a few pre-set vibration settings, Syntron Dental Packers offer variable control, from barely perceptible levels to full power. You simply dial the vibration adjustment for the type of investing and model pouring desired.

These units are completely self-contained and the drive units are enclosed in aluminum for resistance to rust and corrosion. They're small and light weight so they can be easily moved to wherever they are needed. The one-piece rubber deck has a raised rubber lip that helps keep the mold or other material on the deck during operation. The rubber deck is removable for easy cleaning.

Syntron Dental Packers are designed for heavy-duty use in a variety of dental or laboratory tasks. These space-saving units are known for their long-life, quiet operation and dependability.

To order a Syntron Dental Packer or for more information, contact FMC Technologies, Material Handling Solutions, Homer City, PA 15748.

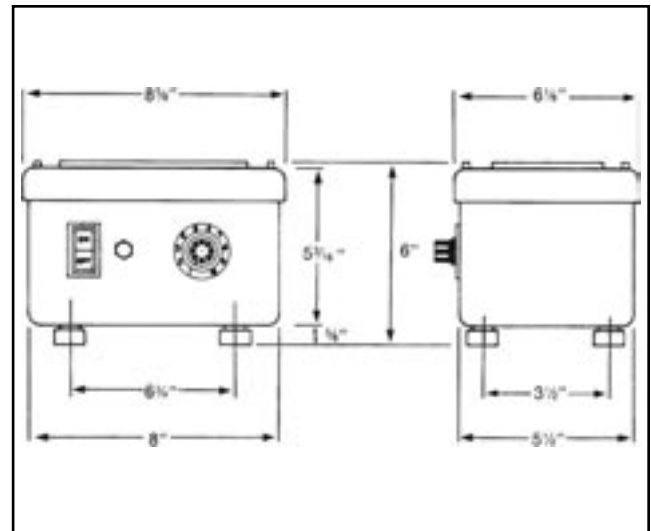

Model DL-1 Dental and Laboratory Packer

Syntron Model DL-1 Dental and Laboratory Packers are U.L. Listed and operate from 115 volt, 60 cycle, single-phase AC power. They are also available for 115 volt, 50 cycle or 230 volt, 50 or 60 cycle.

SPECIFICATIONS:

- Input Watts, 115 V, 60 Cycle 15
- Input Amperes, 115V, 60 Cycle 1.0
- Net Weight 19 lbs.
- Shipping Weight 23 lbs.

Certify all dimensions for installation purposes. FMC Technologies reserves the right to make changes, without notice, in materials, equipment, specifications and models, or to discontinue the manufacture of models, parts and components at any time.
